Subject: Re: Burlington Geographic Proposal and Letter Template

Greetings, Matt -

Thanks so much for your letter in support of the Burlington Geographic project. Although we did not end up being selected for an ECOS grant, we did get just get a different grant to support the launching of the Burlington Phenology Guild, a community and teacher training workshop that will take place up at Rock Point on a monthly basis starting in January.

I am writing to ask if I can meet with the board again on December 3 to follow up on the idea of my graduate student class conducting and ecological inventory of the North 40 under the sponsorship of BCB, and making recommendations to the city as the overall Waterfront Project moves ahead. The class would span the Spring 2013 semester, and it would be great to have our work guided by the needs of the Conservation Board.

Would it be possible to get on the December agenda?

Thanks so much,
Walt
